TZ600 Series Standard Color Chart

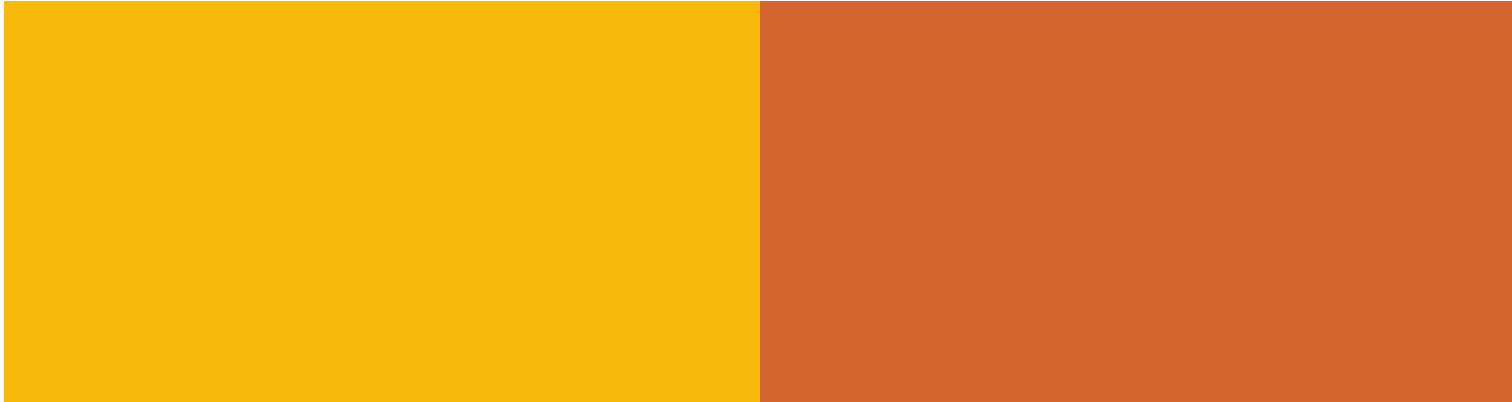

This is our standard RAL Color Palette for all our TZ600 2K series coatings. These color panels are computer-generated and are close approximations of the actual color but may vary slightly. Your computer screen color calibration accuracy and printer will also vary the color. Custom colors, based upon the industry standard RAL codes, are available for an upcharge.

Signal Grey is TZ621, but is not listed in the ISO color table

If you have questions, please first review the various guidelines on the web, and then contact us. These colors are custom mixed to order as per RAL specifications. These Safety Colors contain additional (and now hard to come by and specialized) pigments and resins to achieve the standout, and are priced at a higher rate. Please contact us for current pricing (which is market based).

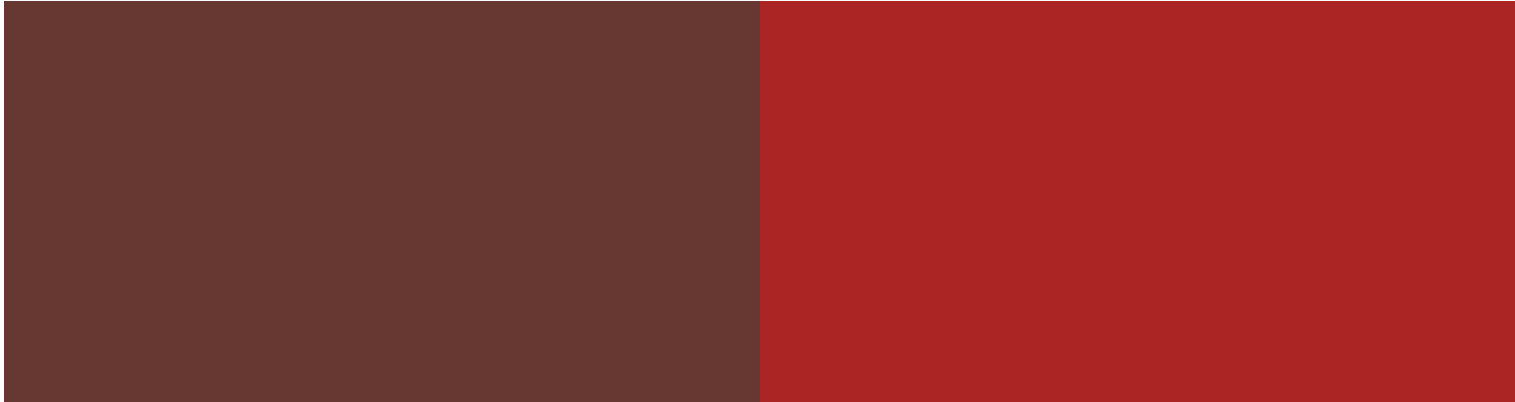

Antimicrobial Finishes

All coatings are also available with a powerful ANTIMICROBIAL (AM) agent. Select the AM version of the SKU.

Custom Colors

If you require custom colors and finishes (metallic etc.), please do not work backwards from HEX code, or PANTONE to RAL as you will likely end up with the wrong color. Instead, start with <http://ralcolor.com/> and we'll quote you based upon volume and pigment availability.
